Covid-19 Situational Update April 14th 2020

Innovative Circuits (ICI) has remained fully operational throughout the Covid-19 crisis. We are considered an essential business and will continue to maintain operations.

Last week the Governor of Georgia, Brian Kemp, enacted new restrictions including a shelter in place order. These restrictions have not affected our work operations to date.

One area of concern for us is material resources as we have been made aware of potential shortages from our vendors. This issue is not isolated to ICI and will affect the circuit board industry globally. We are working closely with all of our vendors to ensure we have the materials needed to complete critical projects. Please be aware this may impact deliveries on a case by case basis. We will continue to notify our clients of any delays in a timely manner.

As always, we appreciate your understanding and support during these challenging times. We are all in this together.
