Covid-19 Situational Update March 23rd 2020

Innovative Circuits (ICI) is considered an essential business and will continue to maintain operations during the current national health crisis. As a critical supplier and sub-contractor for DPAS rated government contracts, Innovative will conduct business as normally as possible during the present conditions.

ICI is dedicated to remaining a seamless link in your supply chain. Please be advised though, that due to the ongoing fluid situation, delivery schedules and quoting capabilities may be slightly affected. We will keep clients updated on potential delays and schedule deviations.

Our employees are our greatest resource and ICI will continue to place their safety above everything else. We have taken every precaution available under CDC, state and local guidelines to insure this.

We appreciate your understanding and support during these challenging times. Let us know if we can be of any additional assistance going forward.
